WORK EXPERIENCE

- Co-Founder, *Pinkilo*** *2023 Apr – Present*
- Led client projects end to end: discovery, scoping, proposals, delivery, feedback cycles, and invoicing
 - Shipped client platforms on Next.js, Sanity CMS, and Vercel; owned DNS, hosting, and email auth cutovers
 - Architected a Kotlin/Neo4j species database with hybrid search, LLM generation, and MCP tooling
 - Set engineering and delivery standards across Git, CI/CD, and Jira
- Sourcing & Community Outreach, *Capital Exotic Fish*** *2025 Jun – Present*
- Increased brand recognition through digital and in-person publicity initiatives
 - Improved operations by digitizing workflows, allowing historical data analysis and accountability
 - Optimized sales margins and increased public interest through improved livestock sourcing
- Full-Stack Engineer, *Editframe*** *2022 Feb – 2022 May*
- Increased product breadth by implementing client APIs in Kotlin/Multiplatform
 - Contributed to each level of the product stack through new features and architecture design meetings
 - Clarified API syntax through frequent collaborative refactors
- Frontend Developer, *Next Phase Services & Solutions*** *2021 Jul – 2021 Dec*
- Wrote effective, clear React/js code to meet strict federal guidelines
 - Worked with and modified open source projects for internal use
 - Coordinated with designers and business managers to set goals and meet client needs
- Software Engineer, *Birdwell Solutions*** *2020 Aug – 2021 Jun*
- Led work in full-stack web apps using React Native, Node.js, and MongoDB
 - 100% on-time project completion through careful team management and clear client-dev communication
 - Introduced detailed documentation into existing client code-bases

PROJECTS

- Strife, *Kotlin Implementation of Discord API***
- Created type-safe implementations of the Discord API, reducing debug & optimizing development time
 - Increased API coverage through significant code-base contributions
 - Introduced and maintained detailed documentation standards and unit testing
 - Grew user-base with consistent community management and assistance
- Evolution Emulator, *Simple Population Genetics Emulator***
- Designed and programmed a population genetics emulator in Java
 - Refactored entire code-base in Kotlin to take advantage of asynchronous, multi-threaded programming
 - Capable of emulating multiple environments down to each organism's full genome and reproduction

SKILLS

Languages & Frameworks — Kotlin, TypeScript, JavaScript, React, Next.js, Java, Node

Data & Infra — AWS, Neo4j, MongoDB, SQL, Sanity CMS, Vercel, GitHub Actions, Docker, Unix

AI & Tooling — LLM integration, MCP servers, Claude API, Jira/Confluence administration, MSFT 365 tenant management

Soft Skills — Sales, Communication, Leadership, Planning & Coordination, Quick Learner, Critical Thinking, Proposal Drafting, Project Management
